**The Laboratory of Biodiversity and Biotechnological Technics for the Valorization of Plant Resources (BTB\_VRV)**

**Host a webinar via Google Meet titled:**

# **The First International Seminar on Biotechnologies, Biodiversity and Sustainable Development (SIB2D2)**

**November 21-22, 2021**

## **Goals**

- Contribute to the development of various sectors and actors associated with biotechnologies;
- Focus on the production of bioactive molecules and enzymes for industrial use;
- Develop strategies for manufacturing biotechnological products (natural metabolites);
- Promote research in various lines of biotechnology and environmental protection;
- Strengthen studies leading to the preservation of phylogenetic bio-resources;
- Discuss the socio-economic impact of biodiversity and biotechnologies in relation to sustainable development;
- Promote and systematize the process of technology transfer;

- Promote the national economy by marketing Algerian biotechnological products instead of imported products;
- Contribute to the use of innovative biotechnological products, in particular bioactive molecules and enzymes, of industrial interest as an alternative to chemicals harmful to the environment and health;
- Boost and systematize the valorization and transfer of technology at the University of M'sila, especially through the creation of spin-offs / startups specializing in biotechnology;
- Join networks and clusters specializing in industrial biotechnology of enzymes through partnership with the national socio-economic fabric;
- Perpetuate contacts and relationships (Research-Industry) through networking & clustering actions.
