Homework (5): Read the text and answer the questions that follow:

The eighteenth century Scottish economist Adam Smith advocated the technical division of labour. This principle depends upon the advantages that come from specialization of workers in specific operations of the productive process. In other words, work is shared out among the workers; each is responsible for a part of the job and all workers dependent on each other for the end product.

Question (1): Give the meaning of the following words verbs and in English (5 points)
